

# SHAPING THE MOLDS OF THE FUTURE TODAY

**With 15 Years of Industry Experience, We're by Your Side**  
From automotive to white goods, create a difference in your industry with our innovative design and production solutions.

# ABOUT US

Next-Generation Technology and Controlled Engineers

## SHAPING THE INDUSTRY

### FROM MOLD DESIGN TO PRODUCTION, YOUR LEADING PARTNER IN THE INDUSTRY

IDEA Mold offers exceptional solutions in plastic injection and aluminum casting with its deep industry knowledge of 15 years. Serving a wide range of industries from automotive to white goods, it is dedicated to meeting its customers' needs. Its experienced team implements your projects with a commitment to excellence, using the latest technologies.

#### Our Values

We continue to uphold our vision of being a leader in the industry with a focus on quality, innovation, and customer-centricity.

#### Our Technology

With our constantly evolving technology driven by research and development and innovation, we offer the latest trends and solutions in the industry.

#### Our Future

With our commitment to sustainability and advanced technology, we are shaping the future of the industry today.

# AREAS OF DISTINCTION

## Shaping The Industry

01

### Industrial Design

At IDEA Mold, we specialize in industrial design. With over 15 years of experience, we provide our customers with unique design solutions in various industries. Industrial design not only enhances the aesthetic value of your products but also improves functionality, ergonomics, and productivity.

02

### Mold Design

At IDEA Mold, with our expertise in industry-leading mold design and production, we provide our customers with unique solutions. Mold design is one of the crucial steps in the manufacturing of your products, and an excellent mold significantly impacts the quality and performance of your product.

03

At IDEA Mold, with our expertise in 3D prototyping, we help accelerate your product development process and reduce costs. 3D prototyping provides an effective way to bring your ideas to life and test your products.

04

### Project Management

At IDEA Mold, with our expertise in project management, we successfully manage complex projects. We are ready to collaborate to complete your projects on time, within budget, and with high quality.

05

### Mass Production and Turnkey Solutions

At IDEA Mold, we provide turnkey solutions to meet your mass production needs and make your business easier. We manage the mass production process from start to finish and are here to help you turn your business into a competitive advantage.

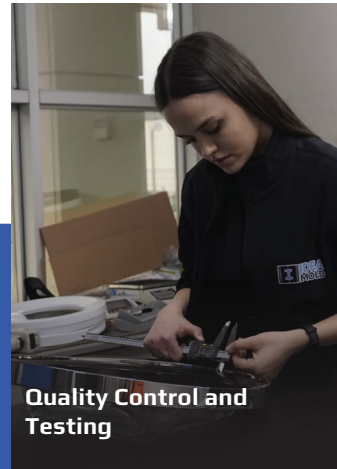

### 3D Prototyping

## SECTORS

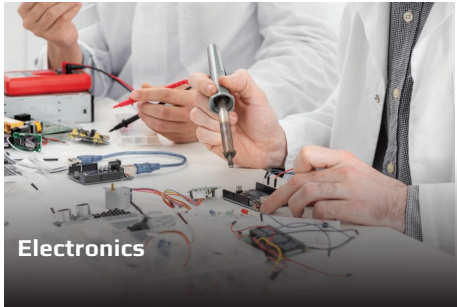

IDEA Mold serves a wide range of sectors. We are aware that each sector has its unique needs and challenges. Therefore, we provide customized solutions in various fields, including automotive, electronics, medical, energy, and more. Whether you are a small-scale business or a global corporation, we are here with our sector-specific expertise to take your projects to the next level.

Automotive

White Goods

Electronics

Aviation

## SOLUTION PARTNERS

# DESIGN PHASES

## STEP 1

### CONCEPT GENERATION

We start by generating innovative ideas and create concepts that align with customer needs and industry trends.

## STEP 2

### DETAILED DESIGN

We conduct detailed design work to bring ideas to life. During this phase, all technical specifications and functions of the product are determined.

## STEP 3

### PROTOTYPING

We create prototypes to test the functionality and aesthetics of the design. This helps us identify any shortcomings or areas for improvement before the product is released to the market.

## STEP 4

### FINAL DESIGN AND APPROVAL

We create the final design based on the feedback obtained from prototype testing and present it for customer approval.

# PRODUCT DEVELOPMENT PROCESS

## Idea Generation

We gather innovative product ideas based on customer needs and industry trends.

## Research and Analysis

We analyze the feasibility and market potential of the ideas.

## Testing and Evaluation

We test prototypes under real-world conditions and evaluate their performance.

## Production

We prepare the products that have passed the tests successfully for mass production.

## Quality Control

We ensure the product's excellent quality throughout the production process and afterward through continuous quality control mechanisms.

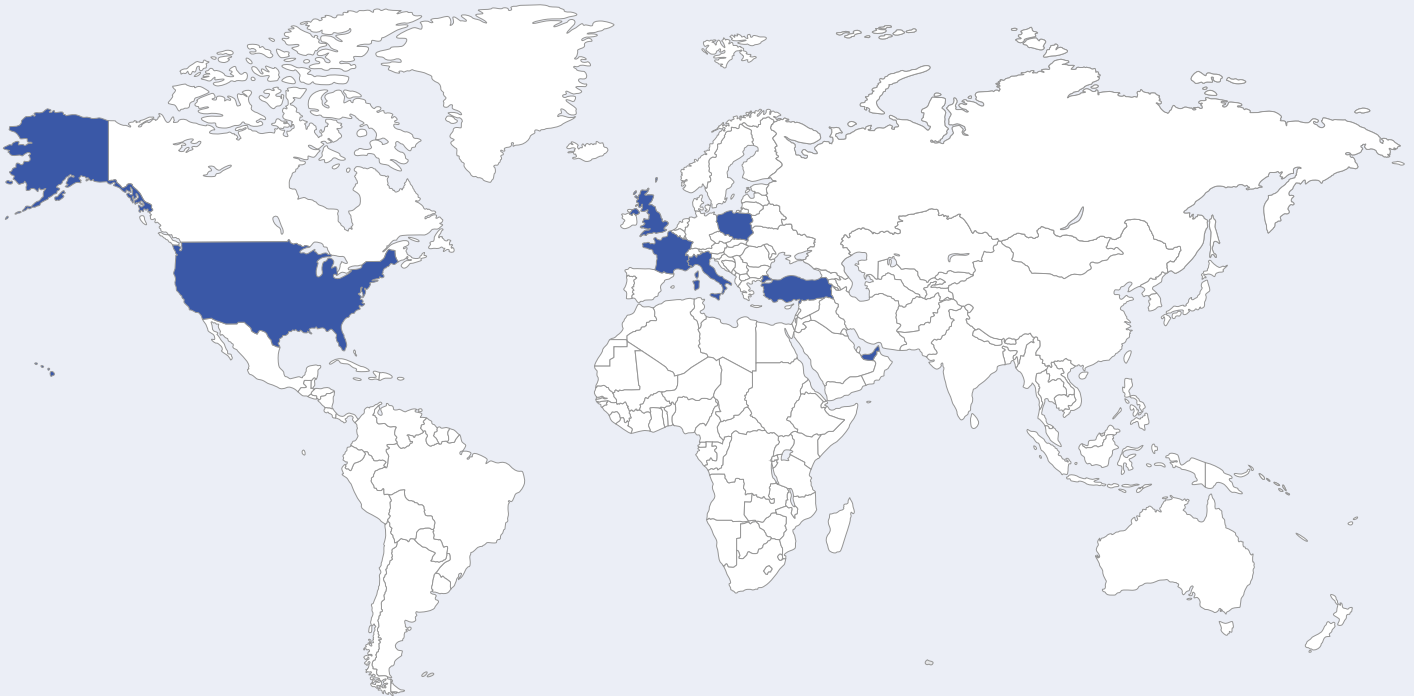

## Market Launch

We introduce the products that have passed quality control to the market.

# OUR OPERATIONAL REGIONS

Especially in Turkey, the United States, the United Kingdom, the United Arab Emirates, Poland, Germany, and Italy, among others.

**We Serve in 20+ Countries.**

# CONTACT INFORMATION

We strive to provide the best service to our valued customers. You can contact us for any questions, feedback, requests, complaints, or proposals.
